

FIREWORK CHAMPIONS

CASE STUDY

Firework Champions & Stately Floyd

Since 2002, Firework Champions have been dazzling audiences with eight large-scale outdoor events annually. These events are renowned for their innovative integration of traditional fireworks with cutting-edge mass drone light show technology. 2024 marks the debut of Stately Floyd, a pioneering event that combines fireworks, drone swarm, lasers, lights, and live music, all synchronised to concert music for a world-first spectacle.

Calvin Hanks' H&S services are essential for Firework Champions and Stately Floyd due to the unique risks of blending fireworks with technologies like drones and lasers with audiences of many thousands. The team's expertise in managing the inherent risks of such innovative and large-scale productions is vital for the seamless execution and continued success of these ground-breaking spectacles.

"In a world that is more demanding than ever of H&S compliance, we contacted Calvin Hanks in 2017 to ensure we were compliant with our considerable H&S obligations. Calvin and the team not only overhauled our procedures and brought us up to another level they still do so to this day. We run eight large-scale outdoor firework events with not only firework displays but also mass drone light displays, laser shows and a full team of caterers. We have enjoyed an incredible six years working with this company and the peace of mind provided by using his services is immeasurable."

John Malam,
General Manager,
MLE Pyrotechnics.
