

CASE STUDY

The Rotary Club of High Wycombe

The Rotary Club of High Wycombe planned an exciting, high-speed car event to raise funds for local charities, inviting classic and modern car owners to test their vehicles on a live air-park runway. The event offered the public a unique chance to witness these cars in action and view them up close while static, creating a thrilling experience for both participants and spectators.

To ensure the event ran smoothly and safely, the Rotary Club enlisted Calvin Hanks safety services. We worked closely with the team, managing all safety plans, risk assessments, and council approvals required to meet high standards. From organising the display and speed zones to overseeing catering and exhibitor areas, Calvin Hanks was on-site throughout the event to ensure everything adhered to safety protocols, allowing the day to unfold seamlessly for everyone involved.

“Rotary could not have undertaken this event without Calvin’s professional help. The knowledge that we were fully compliant and that he made sure we did not overlook anything was comforting, allowing us to do what we needed to do: put on an event with fast cars and raise money.”

Rotary Club of High Wycombe

Calvin Hanks’ team expertly provided full Health & Safety compliance support for Sound of Speed, aligning all operations with HSE guidelines. Our comprehensive services included:

Pre-event Planning

Safety management plan creation, support of local authority approval including SAG meeting attendance, and medical provision selection.

Live Safety

Dynamic event monitoring including fire risk and vendor food safety to ensure compliance.
