

CASE STUDY

The Llangollen International Eisteddfod

The Llangollen International Eisteddfod, held annually in North Wales, is a renowned global festival celebrating cultural diversity and international friendship through music and dance. Since its inception in 1947, the event has become a symbol of peace and goodwill, drawing participants and visitors from around the world. With its dynamic array of competitions, performances, and parades, the festival presents unique challenges in ensuring the health and safety of all attendees.

In this vibrant and complex setting, the Calvin Hanks team played a crucial role. Stepping in at short notice, our expertise and commitment were instrumental in addressing the event's specific safety needs, ensuring a secure and enjoyable experience for everyone involved. This case study highlights our significant contribution to the successful and safe conduct of this celebrated international gathering.

"This year Calvin Hanks staff were able to step in at short notice to work with Llangollen International Eisteddfod. You are always nervous when working with a new event team but we need not have worried. Due to the short notice, we worked with a team of co-ordinators and they all worked to the same high standards. We had one critical incident which happened just as our biggest audience were exiting the site and the Calvin Hanks representative took over, organised our volunteers and co-ordinated with the emergency services. At the end the emergency services cited the organisation as being exemplary. Feedback from our volunteers has been nothing but positive and we look forward to working with Calvin Hanks staff in the future."

John Blaze
Chair Ground Committee
Llangollen International Eisteddfod.

Calvin Hanks' team expertly provided full Health & Safety compliance support for the Llangollen International Eisteddfod, aligning all operations with HSE guidelines. Our comprehensive services included:

Build Safety

Ensuring safe construction practices during pre-event construction and setup.

Live Safety

Continuous monitoring of all event areas to ensure ongoing compliance with H&S standards during the event.

De-Rig Safety

Overseeing the safe post-event breakdown and clean-up.
