

CASE STUDY

Transitions Beach Festival

Transitions Beach Festival is a unique London-based event that combines beach vibes, wakeboarding, and live music, all set on Thorpe Lakes next to the popular Thorpe Park theme park. The festival has hosted notable acts like Disciples, Mike Skinner of The Streets, and DJ Danny Howard, drawing in crowds eager for entertainment by the water. Located on a peninsula surrounded by deep water, the festival grounds offer a one-of-a-kind setting for both thrill-seekers and music enthusiasts.

Following a thorough site visit, we prepared a comprehensive event safety plan tailored to the festival's unique environment. Special attention was given to public access and egress over the floating pontoon, emergency protocols, crowd management, and food safety. Our plans also covered essential water rescue operations, medical provisions, and contingencies for adverse weather, ensuring that all teams—from event management to security and medical staff—had detailed safety protocols to provide a secure experience for all attendees.

“Calvin came on board to bring our event health and safety up to date and ensure its implementation in the run up and during the event itself. Calvin was a pleasure to work with and brought a wealth of knowledge to the table which had a significant and immediate impact on our event which was running into its fourth year.”

As an event with many facets, Calvin and his team were able to advise and assist across all our planning needs.

Calvin was on site for the event itself and oversaw all safety and compliance. He conducted himself well with all our in house team along with contractors who had been brought in and it provided a level of confidence that operations were being conducted to the required standard. I would have no reservations in using Calvin again in all our future events.”

Thorpe Lakes Watersports Resort

Calvin Hanks' team expertly provided full Health & Safety compliance support for Transitions Beach Festival, aligning all operations with HSE guidelines. Our comprehensive services included:

Pre-event Planning

Creation of safety management plans including crowd risk, adverse weather, food safety, water rescue, medical risk and medical provision selection.

Live Safety

Dynamic event monitoring including liaison with contractors to ensure compliance and noise management.

Post-event Safety

On-site monitoring of post-event activities, ensuring safe departure of the public and contractors from the site.
