

CASE STUDY

Acton Carnival

Acton Carnival is a vibrant and inclusive outdoor community event that celebrates culture, music, and the spirit of togetherness. Held annually, it features live performances, a wide variety of food traders, children's activities, and entertainment for all ages. With its welcoming and joyous atmosphere, Acton Carnival has become a cherished tradition for the local community, bringing people together in celebration.

Calvin Hanks was dedicated to helping the event deliver a fantastic experience for attendees while being mindful of the surrounding community. Noise management was a central focus due to the event's scale and its proximity to residential areas. We provided expert guidance to balance the lively energy of the Carnival with the needs of local residents, ensuring a successful and harmonious celebration for everyone involved.

"Working with Calvin Hanks for noise management was an absolute game-changer. Their professionalism, expertise, and tailored solutions ensured that we achieved an incredible milestone—reducing noise complaints to zero! From the initial planning stages to the event day, their team was proactive, thorough, and attentive to every detail. They conducted comprehensive assessments, implemented effective noise monitoring strategies, and provided real-time guidance, allowing us to focus on delivering a seamless event while they expertly managed sound levels. We wholeheartedly recommend Calvin Hanks Noise Management to anyone seeking reliable and effective noise management services for their events."

Chantel Thomas,
ARTification Acton Carnival Project Manager

Calvin Hanks' team expertly provided noise Health & Safety compliance support for Acton Carnival, aligning all operations with HSE guidelines. Our comprehensive services included:

Pre-event

Proactively supported planning with tailored noise management strategies.

Conducted detailed assessments to address potential challenges.

Developed effective noise monitoring plans.

During Event

Offered real-time guidance to manage sound levels.

Conducted noise readings in the local area to ensure levels remained within required limits.

Enabled the event team to focus on delivery while ensuring noise control.
